Lighting & Electrical Power Checklist

Lighting is an art, a melding of sensory and technical aspects that can completely transform the atmosphere of an event or venue. Moreover, good lighting is an essential element for the smooth execution of a party or event.

Here is a practical checklist:

- Do you have sufficient lighting to see within an event space, including all access routes?
- Is there sufficient lighting in support staff/prep spaces?
- Are there lighted exit signs?
- Are there secondary power sources for exit signs in case of power failure?
- Is power in the venue sufficient for your needs?

Questions to determine your power needs:

- What equipment and lighting will need power?
- How much power will the equipment and lighting need?
- Is power available on site?
- How will power be accessed?

Many older homes or commercial facilities may lack adequate power. Ask Prestige Event Rentals to perform a power supply audit before your event, so there are no unpleasant surprises on that big day.
